Deskboxes

O-line

OBO Bettermann Group
The final metre: Deskboxes

High-quality material, elegant design and variable installation options: OBO Deskboxes can prove themselves both in the standard and special designs through their appearance and versatility.

**Direct access to all connections**
The OBO Deskbox is supplied as a ready-to-connect, tested unit with a power cable. It can be equipped with various different country-specific sockets, data connections, protection modules and multimedia modules. Fixed or portable, all of the sockets are within easy reach.

**DBK Deskbox**
Ideal for conference rooms, this Deskbox is a hidden gem. A range of different versions allows you to equip your room just the way you want it.
**DB Deskbox**

*Power to your desktop*

High-grade materials, slimline designs and a range of installation options: the second generation of OBO Deskboxes is ideally sized, both in its standard and special versions. The Deskbox can be positioned anywhere on your work surface.

**DBV Deskbox**

This retracting Deskbox provides electricity and data inconspicuously. Closed, it looks smooth and discreet, flush with the top of the table. But inside there’s plenty going on, and it can be configured in many different ways.
Individual configuration of a Deskbox

Equipping with energy technology

Fastening options for a Deskbox, type DB

Equipping with data technology, switching and connection solutions
Individual versions

Alternatively, from a minimum order of 5, each Deskbox can be configured as required. A wide selection of installation devices and accessories is available for the individual equipping of a Deskbox. These range from country-specific sockets, through data technology and protection modules, right up to multimedia connections. The individual Deskbox is then supplied as a tested and ready-to-connect unit with a network connection cable.

Please note that the equipment components cannot be ordered individually.
Deskbox DB: good and flexible
High-quality aluminium, slim design and variable installation options. The Deskbox DB can score both in the standard and special designs through its appearance and versatility. The box, made of high-quality aluminium, can be positioned anywhere at the workplace, thus offering a range of design options.

Surface variants (profile)
The Deskbox DB is supplied as standard with the surface in anodised silver. Other anodised surfaces are possible for larger orders.

Flexkanal
The Flexkanal routes the cable in a protected and ordered way from the supply point to the Deskbox. The Flexkanal holder, which is included in the accessories, permits a simple and safe fastening on the Deskbox.

The Flexkanal runs your cables ordered and protected to the desk. It connects the Deskbox with the dado duct or with the floor connection box. When extended, the Flexkanal is 1,000 mm long, 60 mm wide and 20 mm high.
The trunking consists of two chambers, capacity per chamber:
two cables of 8.5 mm diameter or three cables of 7.5 mm diameter or four cables of 7.0 mm diameter or five cables of 6.0 mm diameter.
Gone in a flash. The lowerable Deskbox DBV
Let power and data simply vanish into the recess. If necessary, the Deskbox DBV can simply be pulled out - the appropriate plug connections are then easy to reach.
